

**Acquired/Immune-mediated Thrombotic Thrombocytopenic Purpura (iTTP)
2020 Virtual Patient and Care Partner Advisory Board**

Patient and care partner recruitment request

Do you or a loved one have acquired thrombotic thrombocytopenic purpura, sometimes also called “immune-mediated TTP” or “iTTP”? Are you interested in having your voice represented in the development of new treatments?

A global pharmaceutical company is interested in gathering **insights from people with iTTP and their care partners** in order to better understand the patient and care partner perspective on **meaningful outcomes and unmet needs and to inform clinical trial design.**

The company is looking for people with iTTP and their care partners to participate in a **virtual advisory board meeting in June or July, 2020.** The meeting may have several sessions across multiple days. Participants will be compensated for their time.

Participants must:

- Have a confirmed diagnosis of iTTP and have experienced an episode in the past five years;
OR
- Must be a care partner to a person with a confirmed diagnosis of iTTP who has provided care during an episode that occurred in the past five years.

Participants must also:

- Be aged 18 years or older; and
- Speak fluent English (comfortable speaking in English about medical topics); and
- Have access to a computer with reliable internet access and a camera

The company has contracted VOZ Advisors to facilitate the advisory board meeting. If you are interested in the opportunity to share your perspectives or have any questions, please contact Gabrielle France at gfrance@vozadvisors.com.
